KC.11a Negotiating Britain's exit from the European Union may come down to striking a balance between being in the EU single market and having control over who can enter, live and work in the UK from Europe – which should the UK Government prioritise? On a 0-10 scale where 0 means being in the EU single market at all costs and 10 means being able to control immigration at all costs, where do you think the balance should lie?

KC.11b Negotiations might also come down to striking a balance between being in the single market and paying into the EU budget. Now, on a 0-10 scale where 0 means being in the EU single market at all costs and 10 means not paying any money at all into the EU budget, where do you think the balance should lie?
